On February 5, 2026, the “Made in Uzbekistan” national exhibition commenced in Islamabad, Pakistan, within the framework of the Uzbekistan–Pakistan Business Forum.

The event has become an important platform for showcasing Uzbekistan’s export and industrial potential on the international stage.The exhibition covers an area of 600 square meters and features 11 thematic stands representing the key sectors of the economy.

These stands display products and solutions manufactured in the chemical, oil and gas, mining, and defense industries. More than 100 domestic enterprises are participating in the exhibition with their products.The exhibition exposition also includes products manufactured by enterprises within the system of Joint Stock Company “Uzkimyosanoat”. This contributes to expanding the export potential of the national chemical industry and establishing new partnership ties.
