In the context of the rapid development of information technologies, cybersecurity and adherence to cyber hygiene principles are becoming increasingly important. In this regard, “Uzkimyosanoat” JSC held a seminar-training aimed at enhancing the cyber literacy of employees from the Automated Information and Analytical Center, the company’s departments, and system enterprises.

During the event, specialists from the “Cybersecurity Center” State Unitary Enterprise discussed relevant topics such as protection of confidential information, multi-factor authentication, phishing and cyber fraud, messenger and email security, as well as cybercrimes committed using artificial intelligence.

This event serves to improve employees' cyber literacy and strengthen information security.
