Tashkent, September 23. The *Uzexpocentre National Exhibition Complex* hosted the official opening ceremony of the **15th Anniversary International Exhibition “Plastex Uzbekistan 2025.”**

The event was attended by the **management of “Uzkimyosanoat” JSC**, along with representatives of leading international companies. This year’s exhibition has set a record, bringing together **more than 250 companies and brands from 10 countries**, including **Germany, China, Turkey, India, Russia**, and others. The exhibition will run until **September 25**.

Starting from **2025**, the exhibition is being held in an **expanded format - 4P Central Asia (Plastics, Polymers, Packaging, Printing)**. This new concept unites four interrelated sectors and covers the entire production cycle — from polymer raw materials to packaging, recycling, and printing technologies.

During the event, **“Uzkimyosanoat”** representatives explored **advanced industrial equipment, innovative polymer raw materials, eco-friendly packaging solutions**, and **finished products** that comply with international quality standards.

Particular interest was drawn to **energy-efficient technologies** and **polymer waste recycling and utilization solutions**, which are essential for achieving **sustainable development** and ensuring **environmental safety**.

Participation in such large-scale international exhibitions allows **chemical industry specialists** to expand their expertise, follow global industry trends, and introduce innovative solutions into Uzbekistan’s national production sector.
