Uzkimyosanoat JSC held a working meeting with representatives of the Russian company AVK JSC. The parties discussed prospects for cooperation in the field of catalysts used in syngas production.

During the talks, the sides reviewed in detail the technical characteristics of the catalysts, the possibilities of introducing them at local enterprises, as well as practical areas for further collaboration.

In addition, the potential implementation of joint projects and opportunities for technological exchange between the companies were discussed.

The negotiations took place in a constructive atmosphere and marked an important step toward strengthening mutually beneficial cooperation.
